   Company or University: Harvard Medical School
   Delivery/Ship-to Address: 200 Longwood Ave. WAB 561, Boston MA. 02115 ATT
   Email Address: Calixto_Saenz@hms.harvard.edu

2. **Billing Information and Payment Method:**

   Bill-to Name and Phone Number: Michael Anderson
   Bill-to Address: 320 longwood ave, Enders 615, Boston, MA 02115
   Email for Billing Receipt: michael.anderson@childrens.harvard.edu

3. **Payment Method (check one)**: ☐Credit Card ☑Company Purchase Order:

4. **Shipping Method:** FedEx Priority Overnight® (Next Morning) (Options: FedEx or Priority Mail.)

(DFRRU) (DFRRD) (CFRRU) (CFRRD)

Mask Name (please list all masks)	Number of images per file	Image Size (W" x H")	Plot Resolution (10K, 16K, 20K, 25K, 32K, 40K, 50K DPI) or min. Feature Size (microns)	Image Orientation and Polarity (please reference images above)
Mask1	2 chips	3" wafer	10K dpi (25 µm minimum)	CFRRD
Mask2	2 chips	3" wafer	10K dpi (25 µm minimum)	CFRRD
Mask3	2 chips	3" wafer	10K dpi (25 µm minimum)	CFRRD
Mask4	2 chips	3" wafer	10K dpi (25 µm minimum)	CFRRD
Mask5	2 chips	3" wafer	10K dpi (25 µm minimum)	CFRRD
Mask6	2 chips	3" wafer	10K dpi (25 µm minimum)	CFRRD

Special Instructions / Comments – Please enter below:

PLEASE SHIP TO:
Atte: Calixto Saenz
Harvard Medical School
120 Longwood Ave
WAB 561 Boston, MA 02115

The final mask size will typically be 1" larger than the image size. For instance, a 4" wafer will require a 5" mask. If you build your own border into the design, then we will not add to it.

The Field (background) is the area outside the extreme outermost entities in the design, and typically extends out to the edge of the film.

Right Reading Down (RRD) means that we will mirror the data before we plot it, so that the image will have the same orientation when printed onto the substrate as it is in the original design.
